## Processing of automotive steering parts

# 67 years since the foundation, a professional group of processing with keep developing

### Business outline

## Being proud of high reliability from major automotive parts' manufacturers

Mikasa. Co., LTD. was founded in 1955, and having history of 67 years this year. They improve business results mainly with cutting and drilling of housing parts for automotive steering parts, and they also deal with manufacturing various industrial machines and vessels' parts. "At first, we were struggle one after another as we started from scratch." The president Go Mikasa who was appointed as 7th president in 2013 looks back the time as it. While having subjects such business succession, they exert rebuilding the business. Also, they pursued reorganization with making young employees as their hard core, then by fusing employees' wisdom, they build processing skills which obtain great reputation from their clients. They're a professional group of processing which keep developing even now.

Horizontal type machining center

### Strength

## Consummate equipment and firm inspection system

They've obtained trust by actively proposing VA/VE from drawing level based on improvement activity for over 60 years in automotive industry which has tough demands about QCD. Also, consummate equipment is their strength. In addition to 127 various facilities in total such the latest 5-axis and horizontal type machining center, they newly installed such CMM and roundness

measuring instrument. They connect to quality assurance by a sure inspection system. Additionally, they're diligently attempt to employees' training. At production sites, they build one-to-one structure by new employee and veteran, and trying to improve their skill and eliminate manufacturing errors through communication.

### Growth strategy

## Pursuit development to various industries and employees' happiness

They promote to develop to various industries based on the accumulated technology and quality for automotive industry and achievement of meeting deadlines 100% of the time. They strengthen to capability to deal with high-mix low-volume production. Also, they develop the growth strategy with full participation management. The key for that is surely human resources. The average age of employees is 37 and they have lots of young generations compare with their competitors. They effort to build environment commit to management even for young employees, they take the barrier away with management and veteran employees. Automotive industry, which inevitably need to be electrification, is considered as facing significant turning point once in a hundred years. Hence, they're trying to overcome this difficulty by strengthen solidarity of all employees.
