Business outline

Develop house brand by synergy with other fields

Kotsu Dengyosha Co., Ltd. is a special manufacturer of equipment for trains and buses which has the history of 75 years. They're skill full at developing display equipment such LED type and liquid-crystal display and, they develop barrier-free equipment such safety equipment of security camera system and door opening and closing warning lights. They've created house brand products such liquid-

crystal display "Aya-Vision" which enhance legibility and view angle and advertisement distribution system "Para-Signage" by synergy with other fields' companies. Their foundation is in 1947. They were born to restore train in Osaka city after wars. After that, along with technology development, they accumulated technology while transferring to develop electronic devices. Now they have been working on technology development of AI and IoT to deal with digitalization.
