Products development

Pushing forward on "impressed products for clients"

They work on loads of handcraft tools with full of ideas, and the number of products are over 3,000. Above all, they hung up convenience from selecting material to processing, and they developed their main product bamboo knitting needle "Takumi". They research various condition such habitat, felling season, way

to cut and way to transport of Moso bamboo which is the material of it, and pursued characteristic which demanded to knitting needles such as hardness and strength. In addition, they use their unique precision processing technology and creating excellent quality characteristic of "Takumi" such ideal needle tip shape and smooth surface. President Okada says "We will keep pushing forward to produce impressed products for our clients" and our spirit of inquiry for product development never feel weakening.
